FIELD TRIPS

The Board of Education believes that field trips can be a valuable part of the learning process. Teachers are encouraged to consider this type of experience to enhance and support the instructional program. Field trips may also provide extended enrichment opportunities through school-sponsored organizations.

The Board believes that students will receive the maximum benefit from field trips when these experiences are well planned, directly related to the curriculum and/or align with the school system goals.

The Superintendent is authorized to develop administrative regulations that provide guidelines for approving and conducting student field trips, ensure that reasonable procedures for supervision and safety are in place and that parents are fully informed about trip arrangements.
