STUDENT DRESS CODE

The Board of Education believes that student dress and grooming should be clean and neat, and should not be disruptive to the educational process. Moreover, the Board believes that clear standards for student dress must be established, communicated, and enforced uniformly by school level (elementary or secondary) as appropriate. To this end, school administrators are responsible for establishing collective standards within the guidelines of this policy. Additionally, school administrators may use discretion in determining whether clothing is acceptable so that the decision is age appropriate for their students.
